WORK EXPERIENCE

Sr. IT Project Manager

IT Engineering Organization, Carbon Black Corporation - Waltham, MA - 2016 to Present

The First Project Manager in the IT Engineering Organization, brought in specifically to define, and Coach the team to deliver World Class Program and Project Management. The IT Engineering Team reports directly into the CIO and is responsible for the Information Technology for on premise and cloud infrastructure for the End Point Protection Enterprise.

Key Projects and Impact:

- Leading Agile Transformation, from Waterfall to Agile Kanban including - Iteration planning, Jira and Confluence dashboard creation and reporting.
- Leading and Coaching the team to deliver World Class Project management with an emphasis on Transparency and Accountability.
- Led a rollout of a Self Service and Automation virtual Platform (VMWare's vRealize) to the Organization.

Sr. Project Manager-Team Lead

IT Shared Services PMO, ikaSystems - Southborough, MA - 2015 to 2016

The IT Shared Services PMO team reports in the the IT Shared Services Organization, the delivery team focuses on defining best practice project management standards and manages the IT Project Portfolio.

Key Projects and Impact:

- Led Strategic Program to migrate customer environments to Amazon Web Services (AWS Cloud).
- Led IT Programs and Projects impacting Strategic and Customer Facing goals.
- Defined both Agile and Lean Kanban project Methodologies.
- Defined Demand management process based with transparency to stakeholders.

Manager, Solutions Delivery team (IT Project Management)

McKesson Health Solutions - Newton, MA - 2013 to 2016

The Solutions delivery team reports in the the IT PMO, the Solutions deliver team focuses on working with our stakeholders across the MHS BU to size the appropriate system/database/cloud solution. Then, plan, design, build, and deploy the solution.

Key Projects and Impact:

- Led the effort to design and build a PHI/PII/PCI data Vault environment. This Vault was built with cutting edge technology to provide a secured, monitored, audited environment enabling our IT Operations team the ability to provide a complete data lifecycle paper trail to our customers on demand.
- Led several strategic data center migrations. Systems/Environments migrated included realtime eligibility verification systems and claims processing systems that could not support any downtime. Systems were migrated ahead of schedule and on budget.
- Redefined Team methodology to include aspects of Lean Kanban, PMBOK and GTD. This new workflow enabled our team to leverage the best of all three methodologies to move with agility, share data and support one another easily.

- Develop and drive project plans, highly collaborative stakeholder engagement, fully transparent project execution, risk assessment/mitigation and clear, consistent documentation to hand over to the IT Operations team.
- Developed business cases, project charters, managed and negotiate project deliverables including requirements matrix, project scope, design specifications, and test plans. Core Teams included Development and functional managers, Business analysts, technology developers and partners, quality assurance representatives, and business users.
- Ensure that projects are conducted in compliance with all department standards, policies, and best practices in a highly collaborative continuous improvement format.

Sr. Project Manager

Solutions Delivery Team, McKesson Health Solutions - Newton, MA - 2008 to 2013

Key Projects and Impact:

- Led several large enterprise wide physical infrastructure design, build and deploy efforts.
- Developed Communication plans including periodic reports, briefings and ensuring all key parties are informed of the Project status. Developed and managed work breakdown structure (WBS) and project plans from requirement gathering, to execution, through UAT test script development and testing, to production environment releases.
- Develop and drive project plans, highly collaborative stakeholder engagement, fully transparent project execution, risk assessment/mitigation and clear, consistent documentation to hand over to the IT Operations team.
- Led quarterly Project Management Fundamental education webinars for the IT Operations team.
