I have well over 20 years of motion graphics animation experience. I started my career in New York at MTV before moving on to ABC News, I designed for shows such as ABC World News Tonight, 20/20, and ESPN Sports. I've won Emmy Awards for Good Morning America and was also awarded the Peabody Award for News coverage of the 911 attacks. I then joined NBC as the Lead artist for NBC's Nightly News and the Today show before finally finding my place as Art Director for The Daily Show with Jon Stewart. After 8 years of Emmy award-winning comedy and creative genius with The Daily show staff, I decided to move to Florida. Here in the sunshine state I have done broadcast graphics, website production, creative branding, motion graphics and interactive media for many clients including HSN, Company Man Studios, Achieva Credit Union, The Tampa Bay Rays and The Florida Orchestra just to name a few.

Authorized to work in the US for any employer
