## Back-End Software Developer

Kent, WA - Email me on Indeed: [indeed.com/r/Scott-Evenson/9fbe95501aee2848](https://www.indeed.com/r/Scott-Evenson/9fbe95501aee2848)

A Back-End Software Developer with real client experience. Has developed successful projects both solo and in team. Can effectively communicate difficult technical details to non-technical audiences and have served multiple roles in Scrum Teams. A Certified Scrum Master with leadership skills.  
Authorized to work in the US for any employer

### WORK EXPERIENCE

#### Software Developer

Made In Kent - January 2017 to July 2017

Made In Kent is a web application that allows visitors to search and filter various Manufacturers in the Kent area. Business Owners can use this to find out information about potential competition, potential partners to work with, and the types of jobs and land available to them and their business.

Application Development:

- Developed application using HTML, CSS, and Javascript.
- Worked with Google Maps API.
- Created functions that work with the API to develop clean user experience and interactivity.
- Created PHP scripts to update information on site.
- Worked with real clients to build satisfactory software.

Scrum Training:

- Worked with teams in a Scrum environment, including creating User Stories, Acceptance Criteria, Definition of Done, etc.
- Communicated with clients to describe technical tasks in a non-technical way.
- Participated as a Scrum Master.
- Conducted various tests including Code Reviews, Peer Evaluations, and Usability Tests

Notable Contributions:

Map Search Capabilities, including searching by name and business specific keywords.

PHP Back-End update script to update database information.

A positive and conflict ready team environment.

Project Outcomes:

Live launch of the site in May

Client proposing hosting on city website

Conversion of 4000+ business entries to just over 100+ businesses on the map

#### Software Developer

ESOL - January 2016 to June 2016

ESOL is a web app for Students in the English for Speakers of Other Languages program. Students are able to create, edit, and review flash cards of English words online. Instructors are able to review and grade student's cards.

Application Development:

Created a PHP back-end to save user generated content.

Allowed users to review content they created.

Built an Administrative end to review user content.

Allowed for users to edit previously submitted content.

Created tables and queries using MySQL Based Databases.

Project Outcomes:

100+ User generated content entries

Multiple instructors and classes use this tool.
