## Developer - WebMax LLC

Moorestown, NJ - Email me on Indeed: [indeed.com/r/Alyssa-Stone/f75b407cb629eb5c](https://www.indeed.com/r/Alyssa-Stone/f75b407cb629eb5c)

Authorized to work in the US for any employer

### WORK EXPERIENCE

#### Developer

WebMax LLC - September 2016 to Present

- Converted code from Drupal 7 to Drupal 8.
- Created a backend portal for the company site, while integrating salesforce within the portal.
- Cooperated within a team to create responsive website themes based on Business Requirements.
- Wrote unit tests for Vidverify API collaboration with the company's CMS.

#### Web Developer

New Jersey Infrastructure Trust (NJEIT) - October 2015 to September 2016

- As scrum master, managed meetings with Stakeholders to further productivity.
- Interacted with Stakeholders to help explain a technical approach.
- Met one-on-one with management to help enforce the Agile process.
- Created a weekly agenda to update Stakeholders of developer progress and for a better transition in backlog refinement meetings.
- Introduced adding team members to meetings for a better understanding of the product.
- Refined PBIs so that developers had an easier understanding for implementation.
- Conducted training sessions for stakeholders to transition into using the product.
- Aligned completion of process with defined deadline.
- Removed obstacles so that developers had a smooth transition through their PBI.
- Explained to developers the business process so that PBIs were more shippable to the client.
- As a developer, consistently utilized an MVC approach for more maintainable code.
- Ensured high quality code by collaborating with team members.
- Programmed with Bootstrap to create a responsive UI.
- Integrated one server to another for better maintainability.
- Designed mobile responsive websites for clients from PSD's and followed guidelines from the business requirement document.
- Built themes on a CMS to diversify customers' websites.

#### Intern

ProPhoenix - June 2015 to July 2015

- Learned ASP.NET, JavaScript, HTML, CSS, and SQL
- Worked on a Web Application with a database
- Learned how to configure IIS
