WORK EXPERIENCE

Senior Network Engineer/Analyst

Dominion Power - Glen Allen, VA - March 2014 to March 2015

As a Sr. Network Engineer, I provide highly available and high performing network solutions for our internal Dominion customers. I am responsible for the design process and facilitating the installation of the design. I am well versed with the advanced engineering of multiprotocol routers, multilayer switches, network security devices, copper and fiber optic cabling.

- I am responsible to train junior members of the team and see them and Dominion thrive in excellence of skill and attitude.
- I am a self-motivated and diligent engineer. I enjoy the diversity of working in solitary as well as being part of a team in accomplishing goals and tasks set by others and myself. I flourish in a technical environment while still being a people person of great communication.
- Designed and deployed LAN to WAN networks at numerous Power Stations and Substations for the Eastern part of the country using ASR1k, 4506E, 3945E, Juniper and Palo Alto Firewalls, 2602I APs to support Enterprise Wireless, Voice, Data and Video solutions.
- Designed a network solution as well as assisted with the Wireless Sites Surveys in order to upgrade Dominion campus area networks to support 2nd Generation Cisco 2600 N series Access points with Cisco 5500 series Wireless LAN controllers.

Network Engineer

Northrop Grumman Corporation - Chester, VA - February 2010 to March 2014

4 (Implementation and Design)

- As the Senior technical lead for a team of people I work to fulfill the design and implementation requests for Virginia State Agencies at remote location using Cisco equipment including routers and switches as listed; 6509, 3945, 3845, 2951, 2921, 2911, 2811, 881, 3750 and 3560s.

Other Experience

Virginia Air National Guard - June 1997 to January 1999

Honors

Honorable Discharge from USAF May 1997.

Southwest Asia Service Medal, Operations Desert Storm/Southern Watch July 1994.

United States Air Force - November 1992 to May 1997

EDUCATION

Implementation and Design

Campus Area Networks
