ADDITIONAL INFORMATION

Joined as a fresher in 2007. I have done software development and testing. During my employment tenure I was rated as an outstanding employee in my projects. I have always excelled in my work. I was able to find all the defects during the test and this enabled my team in delivering higher quality deliverables. I was appreciated and recognized by my managers and leader for my excellent contribution toward the quality of deliverables. I have done unit level test, integration test and manual test.

Due to personal reason I have taken a break from my work. Its been 7 years break till now. I would like to resume my career again in software testing, hence I am looking for software testing jobs. I am confident that I can do my best for the betterment of the company and my career growth.

I would like to pursue my career in software testing.
