## Software Developer - Career Education Corporation

chica - Email me on Indeed: [indeed.com/r/shaik-r/eebb53a78c13eb6b](https://www.indeed.com/r/shaik-r/eebb53a78c13eb6b)

- More than 3 years of Professional IT experience in analyzing, designing and developing Web & Windows (Client/Server) based, N-Tier, and MVC applications using ASP.NET, VB.Net, C#, ADO.NET, XML, HTML, WPF, WCF, AJAX, DHTML, IIS, Web Services, CSS, JavaScript, jQuery, AngularJS.
- Knowledge and extensive experience in Microsoft .NET platform using .NET Frameworks, MS Visual Studio, C#, Visual Basic, ASP.NET, ADO.NET, MVC 5 and Microsoft SQL Server.
- Knowledge and experience about Software Development Life cycle (SDLC).
- Knowledge and experience with Object Oriented Programming (OOP) concepts.
- Experience working with Windows Communication Foundation (WCF).
- Hands on experience writing SQL Queries, triggers, views and Stored Procedures in databases including SQL Server and MS Access.
- Experience working with Master Pages, Navigation Controls, Login Controls, Themes and Skins, .NET Server controls, User Controls, Validation controls and Custom controls.
- Extensive experience in SQL Server Database design, maintenance, Database Deployment using schemas.
- Experienced with LINQ and Entity Framework for retrieving data from the database.
- Designed and Developed Web Forms using ASP.NET, C#, VB.NET, XML, XSLT.
- Good knowledge on reporting and analysis using Crystal Reports, SQL Server Reporting Services (SSRS) and SQL Server Integration Services (SSIS) with the .Net environment.
- Team player with good interpersonal and presentation skills, excellent work ethic, self-motivated, quick learner, adapt new technologies.

## WORK EXPERIENCE

### Software Developer

Career Education Corporation - Chicago, IL - July 2015 to Present

#### Responsibilities:

- Built and Maintained several websites which involved coding VB.net, C# ASP.NET, ADO.NET, HTML, CSS, JavaScript, SQL Server, Cold Fusion etc.
- Automated the daily common tasks and tasks related to template based projects to help non-technical people do the changes themselves.
- Created rich UI applications for automating content copy process between servers using WPF.
- Integrated JQuery, Ajax and JSON technologies into client UI for smooth and enhanced experience.
- Worked extensively on SQL Server Management Studio, writing queries to insert, update, delete data, writing complex stored procedures to automate routine processes, using profiler to track queries that run during runtime of the applications.
- Coded Data Access Layer, Business Logic Layer and Validation Layer Implementation of Business Modules using Communication Service (WCF).
- Generated reports using SSRS as per the requirements from marketing team.
- Worked on WCF web service for Communicating with the database.
- Hosted the application that generates business specific URLs for the content added to cloud.
- Written test plans for projects where necessary and provided to QA for their testing purposes.
- Prepared the technical documentation and posted it to SharePoint, so fellow developers can learn the process.

- Used a bug tracking system called JIRA which also involved writing Release Notes for projects, resolving and assigning tickets etc.
- Deployed the developed web applications successfully to IIS.
- Attended scrums as per the Agile-Scrum methodology and on-call meetings with CAB (Change Advisory Board) to get the approval for the changes to push them to production.
- Got trained by Microsoft to keep up with the changes in technology tools.

Environment: .Net Framework 4.5/4.0/3.5, Visual Studio 2013/2012/2010, SQL Server Management Studio 2012, SQL Server Business Intelligence 2012, VB.net, C#, ASP.Net, ADO.Net, WCF, JavaScript, AJAX, Tortoise SVN, IIS 7.0, HTML, CSS, Agile Scrum Methodology, JIRA ticketing system

## **Software Developer**

Ascend Learning - Burlington, MA - March 2012 to July 2015

Responsibilities:

- Actively Participate in team meetings and communicate with clients and third party software vendors to clarify the requirements.
- Design and Develop integration web services.
- Creating Identity Provider applications in VB.net and C# for Single Sign On using SAML 2.0 Standards.
- Working on code fixes to production issues and tracking through HP Quality Center.
- Designing solutions for several requirements like Authentication and Authorization of web portal users, Single Sign On via IDP Initiated and SP Initiated implementations.
- Creating Database deployment and Application deployment scripts.
- Create technical design specifications, unit test cases and results and upload to the SharePoint and HP QC respectively.
- Monitor the change requests, QA and Production issues and resolve or re-assign to concerned resource.
- Coordinating with onsite and offshore developers and providing knowledge transfers on several applications.
- Developed WCF web services to serve the application content by integrating with Database and other internal applications.
- Designed and implemented solutions for Authentication and Authorization of different users and Seamless sign on for Staff users with AD Authentication.
- Utilized .NET Reflections, LINQ, Entity Framework, JQuery, Foundation 4 CSS Framework, and ASP.NET MVC with HTML5 to create dynamic content.
- Working on code fixes to production issues and tracking through JIRA.
- Created required Stored Procedures, Views, Tables, and triggers in SQL server 2012.
- Create technical design specifications, unit test cases, and drafted usage documents and end user training materials.

Environment: VB.NET, C#, ASP.NET 3.5/4.0/4.5 and SQL Server 2012, MSMQ, BizTalk, WCF, JavaScript, AJAX, CSS, XSLT, XML, HTML5, LINQ, TFS

## **EDUCATION**

### **Master of Science degree in Computer Science**

Governors State University (GSU) - Chicago, IL

### **Technology**

Jawaharlal Nehru Technological University - Hyderabad, ANDHRA PRADESH, IN

## **SKILLS**

net (5 years), Ajax (5 years), ASP (5 years), ASP.NET (5 years), C# (5 years)

## ADDITIONAL INFORMATION

### TECHNICAL PROFICIENCIES:

Languages: VB.NET, C#, C++, Java

Web Technologies: ASP.Net, XML, Razor, JavaScript, HTML5, CSS3, jQuery, Telerik, RESTful API, Amazon Web Services, WCF, Infragistics, Dev Express

Development Technologies: MVC, MVP, MVVM, ASP.NET, ADO.NET, Entity Framework, LINQ, AJAX, Web Services, WCF.

Databases:

SQL Server 2008, 2012, Oracle, PLSQL, Handling database of websites via Amazon Web Services, creating and maintaining the web servers.

O.S.: Windows [...]

Framework: .Net 2.0, 3.5, 4.0, 4.5

Other Software: Visual Source Safe, Team Foundation Server (TFS), Subversion, HP Quality Center and Load Runner
