More than 16 years programming and application development experience.

WORK EXPERIENCE

Programmer Analyst

American Legion Hospital - Crowley, LA - 1997 to Present

Using Microsoft Visual Studios, Crystal Reports and Transact SQL to create interfaces for third party companies and reports for government reporting and internal use.

- Monitor and troubleshoot McKesson Paragon interface issues with various third party applications.
- Provide support for McKesson Paragon and Horizon Patient Folder software applications. Using Transact SQL to troubleshoot and correct data errors.
- Participating in client software installation for McKesson Paragon release upgrades.
- In collaboration with key personnel, created the necessary data files to convert the data from an Oracle database system into McKesson Paragon's SQL Server based system. Worked with Paragon to have these files uploaded and tested.
- Designing, writing, and enhancing software using Oracle Developer Suite 6i and PL/SQL to improve efficiency within the different departments as well as hospital wide and to keep up with current hospital policies.
- Produced reports using Oracle report builder to retrieve data for different departments especially for Patient Financial Services and Accounting. Used Oracle SQL to research and resolve problems.
- Provided Support for Patient Accounting, ADT (Admit, Discharge, and Transfer), Order Entry, Accounts Payable, Materials Management, Medical Records.
- Assisting in maintenance of HP-UX, Sun Solaris, and NetApp system operations, which included backup, recovery, system tuning, patching and upgrades.
- Oracle database: table maintenance, patching, assisting in database upgrade process.
- Assisted in the conversion of legacy system to Oracle PL/SQL based system.
