

# David Castillo

Jersey City, NJ - Email me on Indeed: [indeed.com/r/David-Castillo/73e6baee4d24bcfb](https://www.indeed.com/r/David-Castillo/73e6baee4d24bcfb)

4 years of experience programming in a variety of front and back end libraries/frameworks. As well as UX/ UI development and SEO Optimization skills. Expertise in developing and deploying Web / Mobile applications and / or websites in Windows, Linux, and Mac OS X environments. My experience has ranged across technologies such as:

Frontend: HTML5, CSS3 & pre-compilers (SASS/ Less), Bootstrap, Javascript/jQuery, Blaze, Angular, React

Backend: MeteorJs, NodeJs, PHP, MongoDB, MySQL, Wordpress, Drupal, Nginx

Cloud Providers / DevOps: AWS , Linux, Shell Scripting

Version Control Systems: Git

Testing: Phantom.js, Jasmine

Adobe: Photoshop & Illustrator

Willing to relocate: Anywhere

Authorized to work in the US for any employer

## WORK EXPERIENCE

### Web Developer

Dabl3 - Macungie, PA - November 2014 to Present

\* My duties include taking photoshop mockups from our UX/UI Designer and turning them into fully functional front end interfaces using HTML5, CSS3 and Javascript. And libraries such as jQuery, Bootstrap and SASS.

\* I created and assisted in server Integration, database design & architecture. As well as automating and setting up builds for iOS and Android from our application.

\* Built communication layers between the client, database and server.

Dabl3 Merchant App | <http://www.dabl3.com/start/merchant.html>

### Senior Web Developer

Good Marketing Group - Trappe, PA - June 2015 to September 2016

My daily activities include developing and maintaining a user-friendly web content management system for use across internal web sites and client website development.

- I created site layout & user interface by using standard HTML5, CSS3, Javascript practices and full stack development platforms that run Mongo and Node.js in the backend.
- As the senior developer, I was in charge of 'making it happen', So I was constantly challenged by clients, internally at Good Marketing Group, and the industry as a whole to keep up with current web development technology and tools, while making sure it all works together across multiple applications.
- My duties were not only to make a website an on-line brochure but to make it a powerful sales & marketing tool.
- I grew as a developer, gained experience in on-demand deadlines, problem solving and being a team- player.
