WORK EXPERIENCE

Project Manager

Cadwalader - New - 2017 to Present

Project Manager for legal firm managing the implementation of new products, enhancement or upgrades of existing applications, technology optimizations, and driving project prioritization.

- Managing projects within the firm backlog providing status reporting to management, stakeholders, and executive staff regarding the backlog's overall status.
- Supporting the implementation and development of enterprise initiatives in the corporate workspace comprising of accounting, human resources, knowledge management, information technology, as well as for the core business unit of the legal staff.
- Responsible for budgeting, workflow, project management, and process improvement activities for legal projects in partnership with the firm attorneys and administration.

Project Manager

ProSphere / 7Delta - 2013 to 2016

Project Manager responsible for end-to-end delivery of \$50M in multiple government health Program Management Office and web-based and application Software Development IT projects.

- Lead concurrent PMO, agile software development, and infrastructure projects controlling scope, schedule, risk, resources, and cost, while aligning to the business roadmaps.
- Aligned clients and external stakeholders in order to facilitate the definition of project goals and requirements, and translated new and existing business needs into a solution.
- Direct supervisor to 30+ multidisciplinary team members, evaluated employee performance and objectives, and selectively mentored and trained staff for individualized growth.
- Staffed effective cross-functional project teams by assessing the specific client needs, internal management and budgetary constraints, and evaluating available resources.
- Utilized performance tools such as MS Office, Project, JIRA, Rational Team Concert, Primavera, Deltek, and Hyperion, while applying Agile and Scrum methodologies.
- Presented portfolio reviews to executive level, and implemented corrective action plans, quality standards, problem resolution, financial audits, and overall project improvements.
- Conducted development, negotiation, and review of statement of work and service level agreement, and provided contract oversight for consultants, service providers, and vendors.
- Accountable for meeting portfolio objectives and ensuring project milestones were on time and budget, while identifying and promoting new business development opportunities.
- Developed proposal responses to include level of efforts, work breakdown structures, and technical requirements, while working with partners to determine pricing and workshare.

Project Manager

MITRE - 2011 to 2013

Project Manager for multiple government projects responsible for delivering on Agile Software Development, Program Management Office, Operation and Maintenance contracts.

- Developed performance work statements, acquisition plans, independent government cost estimates, technical evaluation criteria, and business and functional requirements.
- Scrutinized program annual budgets, schedules, and work breakdown structures to ensure properly allocated fiscal funding and efficiently scheduled program task plans.
- Led solicitation lockdowns for rapid development of task orders to post a request for task execution plans and led proposal evaluation lockdowns to expedite contract awards.
- Conducted assessments on business practices and efficiencies for process reengineering.

Senior Systems Engineer

Sabre Systems - 2010 to 2011

Systems engineer for the Navy EMALS (Electromagnetic Aircraft Launch System) program responsible for managing acquisition and engineering support teams.

- Developed basic ordering agreements and performance work statements for the lifecycle development and sustainment contracts awarded through multiple task orders.
- Facilitated independent engineering team reviews for subsystem components and engineering procedures for specification and requirements compliance and delivery approval.
- Managed and coordinated interactions between contractor and government personnel.

Senior Systems Engineer

Janus Research - 2006 to 2010

Lead Systems Engineer for the Army WIN-T (Warfighter Information Network - Tactical) Increment 2-3 program responsible for developing acquisition baseline schedules and statements of work.

- Spearheaded the technical evaluation and worked with Army contract officers on negotiation of \$125M and \$890M cost-plus development contract proposals.
- Directed multiple engineering change plans and a firm-fixed price limited rate initial production phase request for proposal valued at over \$2B.
- Presented program-planning reports to include schedules, budgets, trends, and utilization of workforce resources at high-ranking Army program reviews.
- Orchestrated and conducted successful Preliminary Design Reviews, Critical Design Review, and Technology Readiness Assessments.
- Controlled requirements, deliverables, performance work statements, and program risks.

Systems Engineer

Booz Allen Hamilton / Solers - 2001 to 2006

Training developer for the Army WIN-T (Warfighter Information Network - Tactical) Phoenix project responsible for developing e-learning strategies, computer-based and web-based training, and technical implementation. Systems engineer for the Army IDM-T (Information Dissemination Management - Tactical) program responsible for testing, deployment, and change management.

EDUCATION

Master of Science in Engineering Management

New Jersey Institute of Technology - Newark, NJ

Bachelor of Science in Engineering Science

Vanderbilt University - Nashville, TN
