Authorized to work in the US for any employer

WORK EXPERIENCE

Software Developer

Tata Consultancy Services - June 2012 to September 2014

Military Separation Assessment Tool (Client: USAA):

Developed a web application that suggests suitable places for relocation to the US Military veterans based on their financial status. Owned developing the modules that take in the user's input, communicate with multiple backend REST services and display the results along with data visualization charts to the user.

Implemented in Java using the Apache Wicket web application framework and JFreeChart.

- Web Bill Payment (Client: USAA):

Developed a bill payment web application as part of the USAA banking application which facilitates one time payments and scheduling of automatic payments for bills using Java and the Apache Wicket framework.

- Digital Parity (Client: USAA):

Developed a web insurance application which generates auto and home owner's insurance quotes using Java. Migrated and enhanced the existing functionality that was developed using a custom legacy framework (based on Apache Struts) to the Apache Wicket framework.
