- PAYPAL API Developed and designed automated email software for handling expiring ads, emailing client information packages, receipts, invoices, purchase orders, payroll, CMS client handling, and bulk mailers.

Environment: HTML5, CSS3, JavaScript, JQuery, XML, AJAX, MySQL, PHP

Web Developer

Title Source - Detroit, MI - February 2014 to February 2015

Project: Title Source Application

Environment: HTML, CSS, Java script, jQuery, Bootstrap, Angular.JS, Node.JS, JSON

Description:

Title Source is a Home Title Insurance provider company. It provides title insurance for home owners and lenders. In this application, we collect the information about buyer, lender, property details and maintain the records. Based on the information provided, we provide the insurance policy for them for home titles.

Responsibilities:

- Creating Front-end Applications using HTML5, CSS3, JavaScript, jQuery, AJAX, XML and JSON.
- Functionalities include writing code in HTML, CSS, JavaScript, jQuery, and making use of Bootstrap framework and testing the functionalities.
- Worked with the team, helping them build out their markup and CSS. My Specialty is large scale CSS (Sass), focusing on reusability and modularity.
- Familiar with concepts of Directives, Data-Binding and Dependency Injection in Angular.JS.
- Worked extensively on web 2.0 migration from Conventional Web Frame work to Ajax driven framework and extensively used jQuery, AJAX and MVC in Presentation Layer.
- Extensive use of Twitter, Bootstrap, framework to achieve RWD, i.e., makes the portal compatible for various screen resolutions which are trending in the market today.
- Created a CSS framework for using a 12-column grid preferred by the designers as well as implementing parts of CSS to cut down on repetitive code.
- Implemented JavaScript module patterns using asynchronous script loading.
- Involved in writing jQuery based Ajax Requests using jQuery get (url, data, callback, type) or jQuery. Ajax (options) & jQuery. Post (url, data, callback, type) & jQuery. Get (url, data, callback, type).
- Worked on Angular.JS and Node.JS issues and fix the bugs pertaining to various browsers.
- Worked through cross browser compatibility issues with existing styles and new CSS that was implemented.
- Tested cross browser functionality and fixed major layout bugs for supported browsers which include IE6.

Webmaster

Freer Tool and Supply - 2012 to 2014
