

Poonam Bhosle

Java Developer

Chandler, AZ - Email me on Indeed: [indeed.com/r/Poonam-Bhosle/65430fa1e9d5e9cc](https://www.indeed.com/r/Poonam-Bhosle/65430fa1e9d5e9cc)

WORK EXPERIENCE

Java Developer

Pervasive Solutions - April 2016 to November 2016

Project SOAP Web services

Description

Project was to build SOAP Web services interface for the Backend host native applications.

Earlier Backend host application functionality was only accessible using local user interface. We have built the middleware layer of web services so that Native application functionalities can be accessed by different channels like web Portal, IVR etc. using industry standard SOAP Protocol.

Technologies Apache CxF, JAX-WS, JAXB, XML, JAVA, WSDL

Java Developer

SOAP UI - July 2015 to March 2016

Responsibilities

Worked on the SOAP web services using Java /Apache cxf and published it. Clients can consume the web services and send the request data. Web service will get the input and process it as per business logic and then prepare custom format request message and send it to backend host over TCPIP socket.

Duration Jul 2015 - Mar 2016

Smarte Solutions India Java Developer

Project Prospect Data Managements

Description

Collect relevant contact and company information from all over the web.

Platform that will grow as client needs grow with hands-on control to client own dedicated web portal that help them in managing their sales & marketing efficiency.

Technologies JAVA, JDBC, struts, java script, JSP, Servlets, html, MySQL

Tools NetBeans, phpMyAdmin, winCVS

Responsibilities

Developed User Interface so user can search using different search criteria like Category for different datasets, Contact Id, Company id, Status, Country, Business Unit, Significant Incident, Financial Impact, Created By, and Created Date.

User can perform different actions like Edit and view company /contact, search, upload into UI, and Export to Excel. Worked on Struts MVC framework.

Java Developer

Smarte Solutions India - November 2013 to June 2014

Project Contact genie

Description

Relevant Contacts verification done by caller team. Relevant contacts are marked with different types of status. Those entire relevant contacts stack created for different customers. Relevant Contacts platform that will grow as client needs grow with hands-on control to client own dedicated web portal that help them in managing their sales & marketing efficiency.

User can view count of Verified contact and company raised in last one month for Business units of user clusters for different categories datasets.

Technologies JAVA, JDBC, struts, java script, JSP, Servlets, html, MySQL

Tools NetBeans, phpMyAdmin, winCVS

Responsibilities

Designed UI for internal market research screens in such way that MR (market research) team can view count of Verified contact and company raised in last one month for Business units of user clusters for different categories datasets.

Worked on Users having televerification screen to verify each and every contact assigned. After verify contacts update, edit status can be done.

User can search for different criteria like using different datasets, Contact Id, Company id, Status, Country, Business Unit, Financial Impact, Created By, and Created Date.

Developed different JSPs for Televerification screen. Worked on Front and Back end. Worked on MySQL queries to update and Insert contact data. Fetch data from backend and shows on Screens. Developed different Forms to submit data.

Java Developer

Smarte Solutions India - December 2012 to October 2013

Project APR System

Description

Website designs offers to register new user, Forget password, Reset Password, Sign in, Sign out with date/timestamp in different time zone, total final work reports according to date wise.

Technologies JAVA, JDBC, struts, java script, JSP, Session, Servlets, html, MySQL

Tools Eclipse, phpMyAdmin, Dreamweaver

Responsibilities

EDUCATION

Bachelor of Engineering in Electronics & Telecommunications

Pune University

Certification

NIIT Mumbai

SKILLS

html (2 years), Java (2 years), JDBC (2 years), JSP (2 years), MySQL (2 years)

ADDITIONAL INFORMATION

Professional Skills

- * Software Professional with 3+ years' experience in Java.
- * Expertise in developing Java/J2EE based applications.
- * Experience in Involved in Full SDLC - requirement, analysis, design, development, testing and implementation. Having expertise in Object Oriented Programming Concepts.
- * Good co-ordination skills and Strong functional, technical and problem solving skills.
- * Proficient in Customer interaction, having good communication, presentation skills.

Technical Skills

Programming Languages: Java

Java Technologies: Java, J2EE, JDBC, Servlets, JSP

Web Technologies: HTML, AJAX, XML, JSON, EL, Angular2/Typescript, Java Script, JQuery

Database: Oracle, MySQL, Redis

Web Services: RESTful, SOAP, SOAPUI

Frameworks: Struts, Spring-MVC, Hibernate, wicket

Development Tools: Eclipse, NetBeans, phpMyAdmin, Dreamweaver, MySQL-workbench

Application Servers: Apache Tomcat
