Authorized to work in the US for any employer

### WORK EXPERIENCE

#### Software Developer

Ideum Inc - September 2014 to January 2017

Worked on client defined interactive touch software. Projects were completed individually or as part of a team of developers with short deadlines. Provided remote software tech support to clients after software delivery. Provided on demand Web Admin services with Amazon AWS web services. Implemented automated email service used for multiple projects.

#### Software Developer

VanDyke Software - May 2011 to September 2014

Working here provided 3 years experience working in an Agile/XP development environment. Worked on programming tasks which included new feature implementation and bug fixes on an existing software code base. Tasks included developing software for the User interface of both SecureCRT and SecureFX, porting functionality over from the canon Windows software to Linux, Mac and iOS platforms, fast algorithm implementation of text parsing, and data transferring. These tasks were timed based on estimates from the programming team. As part of the Agile environment, all code I wrote had to follow a strict coding standard, continuous integration helped prevent broken code from going unnoticed. Due to continuous release of software, I was responsible for ensuring that software maintained consistent functionality through current releases. Maintained Windows-based installers with Install Shield. Primary coding done in C++ with some work done in Python.

### EDUCATION

#### Bachelor of Science in Computer Science

University of New Mexico (UNM) - Albuquerque, NM  
May 2011

### SKILLS

.NET (Less than 1 year), AWS (2 years), UNIX (5 years), Visual Studio (5 years), C++ (4 years), C# (1 year)

### ADDITIONAL INFORMATION

Operating Systems: Windows, UNIX

Experience with Visual Studio, Amazon AWS services, Google APIs, Install Shield, NullSoft

Experience with Xtreme programming and Agile work environment.
