ADDITIONAL INFORMATION

I am a lifelong Chicagoan. I have been helping many types of organizations with their graphic design needs for over 20 years. I have a commendable background in computer systems, customer sales and service, and purchasing.

Establishing and maintaining good communication with people is of the highest importance to me—from the very first contact forward, up through and beyond the completion of a project.

My design aesthetic has been described as contemporary, clear and organized. I'm highly skilled with Adobe's Creative Suite and in creating effective presentations.
