WORK EXPERIENCE

COLDFUSION DEVELOPER

COSENTINO N.A - Sugar Land, TX - April 2014 to Present

Developed and managed ColdFusion applications to meet the long and short term business objectives of the organization. Designed

plans/operations procedures, interpreted/analyzed requirements, and scheduled all milestones to successfully meet all deadlines in an ambitious environment. Recruited to Rejoin the Organization for Superior Ethics, Technical Expertise, and Leadership.

- * Delivered Near 100% Uptime and Uninterrupted Operations Across 14 Fabrication Shops nationwide responsible for millions of dollars in weekly revenues.

- * Captured \$2M in Annual Operating Savings and Gained Recognition by the CEO of the Organization for Leading the

Outstanding SAP Migration of 12 Production Facilities from Navision to SAP.

- * Surged Communication Levels, Reduced Support Times by Over an Hour Per Day, and controlled chaotic situations by establishing a true support system (JIRA Service Desk) and integrating it within the application. This also provided valuable user and page data when tickets were submitted.

- * Saved Hundreds of Hours of Production Time Annually and Increased Page Load Performance up to 500% for numerous

widely-used pages by diagnosing slow-loading areas and successfully improving codes.

- * Led, Mobilized, and Mentored a Dynamic International Team of Employees and External Contractors dedicated to improving and maintaining customized, enterprise-level web based operations applications. Evaluated objectives to delegate weekly

responsibilities, communicated feedback/objectives, and analyzed performance against benchmarks to successfully increase the clarity and transparency of operations by 25%.

- * Wrote, Launched, and Produced Code, facilitated testing by internal/external stakeholders, led meetings and roundtables with departments across the organization to share progress and suggest software additions/improvements, and identified,

evaluated, and prioritized development issues in legacy code and support.

- * Initiated the Incorporation of a Complete Suite of Web Service Calls Into the Software Home Depot Jobs that Replaced the

Need of Hundreds of Daily Faxes. Secured the connection through token verification and collected/acknowledged new jobs.

WEB DEVELOPER

MISTERART.COM - Houston, TX - May 2011 to March 2014

Managed, audited, controlled, rewrote, and maintained the websites for the largest online art supply retailer as well as similar brand

sites with thousands of unique weekly visitors and millions of dollars in annual revenues while supervising a staff of two.

- * Increased User Retention by Over 25% and Surged Client Sales 20%+ by Establishing a New Wholesale Website Application and Initiating Website Functions/Features that transitioned the incomplete site to a fast-performing, SEO optimized, and powerful site that attracted visitors and converted shoppers to customers on a highly aggressive deadline.

- * Decreased the Page Loading Speed from 5 Seconds to .5 Seconds (less than 10% of original load times) and increased traffic

retention by improving data processes like stored procedures and front-end design like image sprites.

- * Built a Custom Back-End Administration Area that Enabled the Customer Service Department to seamlessly access customer

orders electronically eliminating tons of paperwork.

- * Developed a Mobile Site for the Organization that Allowed Customers to Snap Photos of Product Barcodes and Reorder

Items. This was completed without a need for a custom mobile app which increased customer satisfaction rates, and grew

repeat business/sales.

BART NOBLE • 713-922-5194 • bartnoble@gmail.com

WEB DEVELOPER

COSENTINO N.A - Stafford, TX - August 2008 to April 2011

Built, maintained, and optimized websites for popular product brands, including Silestone, SenSa, and ECO while partnering with the marketing department on special website projects for the internal and intranet sites and managing/leading a team of database

designers, web designers, and web developers.

- * Developed and Managed a "Near 100% Automated" Dropship Website that Generated 1.5M in Revenues Annually and allowed the internal ships to seamlessly purchase fabrication tools supplies. Designed the site from the ground up and

successfully optimized it so that it only required 1-2 hours of human attention daily.

- * Improved Performance and Functionality while Managing the Retail Countertop Design and Purchasing Website, which included interactive kitchen planning tools built in Flash/ActionScript.

- * Recognized by Management for Successes in Quickly Improving ColdFusion skills and utilizing it as the primary development environment.

- * Overhauled the Master Database to a Logical Design that Increased the Clarity in Each Development Project and saved

countless hours of development and processing time across the projects utilizing the technology.

- * Integrated UPS Web Services Into Multiple Websites to communicate the shipping/transport/delivery stages to customers (this

was an innovative process in 2008).
