WORK EXPERIENCE

Software Developer

Xceligent - Kansas City, MO - June 2016 to Present

Xceligent CDX

Xceligent is a leading provider of verified commercial real estate information across the United States. It provides comprehensive listing and property information, verified sale comparables, verified tenant data, lease transactions and market analysis.

Responsibilities:

- Developed an Application Xceligent CDX for managing commercial real estate information as a .NET DEVELOPER.
- Worked in Agile Methodology (Scrum) to meet customer expectation and deadlines with quality deliverables.
- Designed and developed Search Query Engine to perform property search/ lease comp search/ tenant search etc.
- Developed Web Services for the Report Generation Project.
- Worked on XSLT, integrating the datasets with the XSL and generating the HTML.
- Designed and Implemented mechanisms for Saved Searches, Saved Results.
- Involved in database meetings and worked on creating/manipulating the store procedures to match the fields in the front UI.
- Worked on developing internal reports for the business team using SSRS.
- Maintained old Legacy Classic ASP CDX application by working on the JIRA tickets, finding the root cause of the bugs and applying bug fixes.
- Built a parcel locator module, fetching the information of a property based on its Lat Long Coordinates integrating third party DMP service with CDX application.
- Worked on setting up the Data Analytics for CDX application using Heap Analytics and its API.

Environment: Source Tree, JIRA, GitHub, Visual Studio, SSMS, SQL Profiler.

Technologies: C#, VB, MVC, Web Services, Web Forms, SQL, XSLT, JavaScript, JQuery.

Third Party Integration's: Digital Map Product Service, Winnovative PDF Converter, Google Maps, Bing Maps.
