WORK EXPERIENCE

Software Developer

SimCase - December 2016 to Present

Developed real-time web applications for SimCase using Node.js and MongoDB to be used by professors and students at the Kellogg School of Management.

- Collaborated with DavoScript, a software development studio in Santiago, Chile.

Web Developer

LocalAventura - Mexico City, MX - July 2016 to November 2016

Maintained both the frontend and backend of the web application connecting travelers with local tour guides throughout Latin America.

- Developed and designed features in a CodeIgniter framework with PHP, JavaScript, SQL, CSS, and HTML. Features include the messaging system, user system, and quizzes.
- Lead as the only onsite developer in the 500 Startups office in Mexico City and regularly attended workshops provided by the program.

Software Engineer

Infinio - Cambridge, MA - July 2015 to December 2015

Created and managed Chef cookbooks in Ruby with Serverspec testing for various configurations of virtual machines to be used in local development.

- Developed in-house scripts in Ruby and Python for various automated monitoring tasks using Jenkins to schedule runtimes, publish artifacts and send alerts.
- Maintained the infrastructure through various tasks such as base box creation, active directory management, Jenkins configuration, and pxeboot configuration.

System Administrator

Advent International - Boston, MA - July 2014 to December 2014

- Installed and configured new servers/ reconfigured the server room at the office and their rack at an offsite datacenter.
- Provided help desk support to users with varying issues.

EDUCATION

Northeastern University Boston
