Authorized to work in the US for any employer

WORK EXPERIENCE

UX Designer

Tufts Health Plan - Watertown, MA - September 2016 to Present

As the first official user experience hire at Tufts Health Plan, I am responsible for all facets of the UX process. Working closely with developers to understand any technical limitations, I conduct user research and testing, ideate and iterate, and create mockups from low to high fidelity for web, tablets, and mobile.

UX Designer

General Assembly - Boston, MA - April 2016 to June 2016

The User Experience Design Immersive program at General Assembly is a fast paced training course with a specific focus on helping you transition into a UX design career. Over the course of the full-time, ten week program, I have worked on projects, both individually and on teams, in order to build a strong portfolio and the necessary skills/knowledge to enter the field of UX design.

One of my projects:

uberGreen Tracker: Integrated eco-conscious features in to the Uber app.

- Conducted user research regarding the behaviors, needs, and pain points of eco-conscious ride-share users
- Used affinity diagrams, personas, and storyboards to inform my design decisions
- Created and tested a clickable prototype to address my user's concerns
- Made presentation to illustrate my process/product

EDUCATION

BA in Philosophy

University of Massachusetts - Amherst, MA
2015

SKILLS

Usability Testing (2 years), Design Thinking (2 years), Personas (2 years), Wireframing (2 years), Story Boards (3 years), Atomic Design (1 year)
