Willing to relocate: Anywhere

Authorized to work in the US for any employer

## WORK EXPERIENCE

### Web Developer

Spring, TX

A brief explanation of my latest works:

Most of my clients ask me for web pages, or administrative systems in the cloud or webapps, also created mobile apps for some.

During October 2015 at the end of January 2016 I worked for the human rights organization of the UN creating a mobile application in Android that controlled a ROBOT Spider sentinel that was monitoring disabled people.

For them I made an application too in android that helps communicate with deaf people, this application was presented before the senator and delegates of the UN in the federal palace and is used only in the pedagogical institutions of the organizations.

During these months I've finished a few websites, one was for the company RAGOPERSONNEL located in Austin and San Antonio Texas. It is basically a webapp where you recruit staff for your company, business or home in 3 simple steps.

[www.ragopersonnel.com](http://www.ragopersonnel.com)

Another that I just concluded was for a beauty salon located in Dubai, it is called MHGBEAUTY

[www.mhgbeauty.com](http://www.mhgbeauty.com)

My last client for whom I still work uploading inventory remotely is an importer of auto parts

[www.autopartesiaa.com.mx](http://www.autopartesiaa.com.mx) I upload products since they have more than 3mil products

Finally my personal project I advance every time I have, I'm building interactive surfaces for restaurants, museums, schools, corporate buildings, etc., these surfaces detect objects and fingers, gestures

Here is a sample of my homemade prototype, it is just a proof of concept and the name "inuev" (interactive user evolution) all programmed in JAVA language
