WORK EXPERIENCE

Web Developer
Ciber Inc   -   Pittsburgh, PA   -   April 2013 to Present

• Consulting digital marketing development work for Bayer (TeamSite)

◦ Helped to build an Enterprise-level registration system and member's area written in object-oriented PHP and jQuery/JS with AJAX for Bayer Diabetes Care Ireland. System included ability to create profiles with ability to add profiles for children, register glucose meters, order rewards and other free items, upload glucose reports from a user's meter, and download software through a SOAP client. Helped to later migrate and update system for Bayer Diabetes Care UK including a blog system with commenting, reviews for meters, as well as an admin backend for moderation (http://diabetes.bayer.ie, http://diabetes.bayer.co.uk).
◦ Helped create a Patient Leaflet Builder for Bayer Diabetes Care international site in PHP and jQuery which generated user-created PDFs based on drag-and-drop segments of content.
◦ Created a parallax-scrolling site for Berocca (http://buyberocca.com).
◦ Primarily front-end work on other Bayer-owned brand sites including Bayer US, Bayer Pharmacovigilance Training Portal, Bayer Diabetes Care country sites (International, US, France, Poland, Turkey, North Africa, Middle East, Greece), Aleve, Citracal Pro, Flintstones Vitamins, Midol, RID, Wonderdrug.com (Bayer Aspirin), Lotrimin, Coricidin, and Afrin.

• Consulting digital marketing development work for Ascensia Diabetes Care (TeamSite, EpiServer)

◦ Assisted with transition of Bayer Diabetes Care sites to Ascensia in TeamSite, including a new international site and migration of data and functionality from Kentico to TeamSite for Diabetes Care US Consumer and Professional sites. Many functions were based on SOAP interfaces.
◦ Helped create new Diabetes Care microsites in EpiServer, including Algeria, Slovakia, Romania and others.

Web Developer
DashBurst LLC   -   Pittsburgh, PA   -   August 2011 to January 2014

• Designed, coded and maintained websites using PHP/MySQL, HTML5, CSS3 and JavaScript/Jquery.
• Worked with APIs for various social networks including Twitter, Facebook, and Tumblr.
• Designed databases using MySQL for storing cached data generated by the APIs.
• Designed a system using JavaScript for displaying real-time counters of statistics.
• Designed and coded web tools and back-end code for dashburst.com.
• Installed software for and maintained web servers running Ubuntu Server and CentOS.
• Set up and maintained an email server and several web domains on Ubuntu Server.
