WORK EXPERIENCE

IT Applications/Systems Specialist, IT Auditor
 - 2000 to Present

Facilitate numerous information protection assessments (including NIST CSF) and audits for the company's IT platforms and processes.
• Manage various teams to coordinate the disaster recovery plan of the company's SAP computing center.
• Collaborate in establishing state of the art IT infrastructure security and operations monitoring center.
• Render expert supervision over the execution of corporate-wide database and application security.
• Perform diverse roles such as problem and incident manager, change coordinator, service level manager, and Infrastructure Steering Committee member.
• Provide technical training and opportunities to facilitate staff development.

Career Highlights:
• Supervised a team of IT security specialists to preside over an enterprise-wide NIST CSF assessment to cover
the company's business lines, subsidiaries, and international offices.
• Functioned as IT auditor at the company's Internal Auditing Department to perform various audits on data centers, IT governance, change management, Petrochemical Trading Department, and medical facilities.
• Supervised implementation of automated vulnerability assessment and activity monitoring framework for the company's IT platforms.
• Technical lead in execution and drill of the disaster recovery plan for one of the world's largest SAP implementations.
• Pioneered the automation of proactive monitoring of the entire SAP landscape using BMC PATROL, SAP Solution Manager, and various performance and capacity planning tools for applications and databases.
(512) 402-8625 rizviqa@gmail.com ~~~~~~~~~~~

• Played a pivotal role in developing and executing service-level agreements (SLAs), operational-level agreements (OLAs), policies and procedures, security baselines, Emergency Response plans, escalation and incident reporting, and performance and availability KPI reporting.
• Handled several projects and collaborated in all major SAP and Oracle database projects including go-live of various SAP modules, major SAP and Oracle upgrades, data archiving, disaster recovery, operations monitoring, and change management.

Senior Manager of Database Engineering
SABRE INC   -   Fort Worth, TX - 1996 to 2000

Oversaw a team of nearly 40 Oracle database administrators and developers tasked to support a very large, complex, and mission-critical production database environment for the company's major airline and travel industry customers including AA, USAir, Canadian Air, Gulf Air, Swiss Air, Travelocity.Com, and BTS.Com.
• Took part in the design, development, test, and implementation phases of new projects while assisting Development Team members to understand data models; as well as internal and external customers during the new database system planning and migration phases of systems to production environment.
• Served as database administrator to install, configure, troubleshoot, oversee, and maximize several production Oracle databases all while rendering 24/7 technical support.

• Exhibited skills in preparing and tuning complex SQL queries; drafting Oracle stored procedures and triggers; formulating, testing, and executing backup and recovery strategies; as well as generating and expediting process for current and future business.
• Partnered with developers to maximize database designs for performance and to lessen contentions.
• Assumed full accountability in guaranteeing accurate time and labor reporting for entire team and staff development; providing assistance in performance reviews; and managing budgets.
