WORK EXPERIENCE

Software Developer

Frugal Innovation Hub - Santa Clara, CA - October 2016 to Present

Worked as a part of team to develop and implement an android application for Afrobarometer's online data analysis tool
● Developed and tested user interface and SQLite database for a data analysis application without jeopardizing data privacy and security and also wrote unit tests for mobile code
● Created an android application for scheduling and sending messages which helped the employees in effective time
management while also debugging critical application issues such as crashes, memory leaks and concurrency
● Assist team members and provide support and solutions to customer queries to meet company objectives and also maintained
updated knowledge of company products and services to better provide customer support and service solutions

Software Developer

Kunal IT Services Pvt. Ltd   -   Pune, Maharashtra - June 2013 to June 2014

Pune, India
● Developed and tested student side and admin side control system for a web application of Online Exam System which facilitates the online exam for candidates by providing multiple choice question and after completion displays the result
● Developed an android application in which Hindi, Marathi, English daily GK (General Awareness), current affairs and business
questions are given in the form of a sample quiz
● Designed and implemented services and frameworks for mobile platforms
● Designed and built a web application which includes an entire data flow of a three tier application which confirms that all
operations including business logic, validation and crud operations work flawlessly
