WORK EXPERIENCE

Quality Inspector
MOS - San Jose, CA - January 2017 to Present

Database Manager and Android Application Designer & Tester
SuggestMyChoice Incorporation - January 2015 to April 2016

As a team member at SuggestMyChoice, worked on making the database easy to access and easy to enter according to the requirements of the company. Successfully completed this high priority project with accuracy providing much needed backbone for implementation of the algorithm in very short time interval.
• Analysed incoming data from alternate website for accuracy to match exact specifications for the product
• Effectively created logic by connecting alternate sheets reducing time required for entering data in the system
• Inserted required formulas for rearranging input data for compilation into single source sheet for easy access of database
• Performed random check and balance with external websites before final data input to match its accuracy
• Lead interaction with the web developers and add on the fields required for the algorithm
• Monitored design of the Android application and thoroughly tested application making more user friendly with minimal loading time
• Performed working test for the website to assure its working per the algorithm of the company
• Created the crawler to help get the price of each product in very less time and also in the needed format that would directly reflect the price of the product in the column next to the specifications.
• Kept the data sheets, price sheets and all associated linked sheets on the server space securely and in an organized manner.

RESEARCH AND PROJECT EXPERIENCE
Project: Adhop Android application June 2013 - May 2014

• Designed and Developed Android-Application for the company named Adhop.
• Developed Integrated video player
• Increased accuracy by designing and coding Algorithms
• Tools used: Eclipse
