WORK EXPERIENCE

## Web Developer

C&I Studios, Inc.   -   Fort Lauderdale, FL  -  February 2017 to June 2017

Performed or directed Web site updates.

Designed, built, and maintain Web sites, using authoring or
scripting languages, content creation tools, management tools, and digital media.

Wrote, designed, and edited Web page content, and directed others producing content.

Confered with management and development teams to prioritize needs, resolve conflicts, develop content criteria, or choose solutions.

Backed up files from Web sites to local directories for instant recovery in case of problems.

Identified problems uncovered by testing or customer feedback, and corrected problems or refered problems to appropriate personnel for correction.

Evaluated code to ensure that it is valid, is properly structured, meets industry standards, and is compatible with browsers, devices, or operating systems.

Maintained understanding of current Web technologies or programming practices through continuing education, reading, or participation in professional conferences, workshops, or groups.

Analyzed user needs to determine technical requirements.

Developed or validated test routines and schedules to ensure that test cases mimic external interfaces and address all browser and device types.

Developed databases that support Web applications and Web sites.

Wrote supporting code for Web applications or Web sites.

Communicated with network personnel or Web site hosting agencies to address hardware or software issues affecting Web sites.

Performed Web site tests according to planned schedules, or after any Web site or product revision.

Selected programming languages, design tools, or applications.

Incorporated technical considerations into Web site design plans, such as budgets, equipment, performance requirements, or legal issues including accessibility and privacy.

Developed and documented style guidelines for Web site content.

Developed Web site maps, application models, image templates, or page templates that meet project goals, user needs, or industry standards.

Established appropriate server directory trees.

Identified or maintained links to and from other Web sites and check links to ensure proper functioning.

Recommended and implemented performance improvements.

Created searchable indices for Web page content.

Registered Web sites with search engines to increase Web site traffic.

Provided clear, detailed descriptions of Web site specifications, such as product features, activities, software, communication protocols, programming languages, and operating systems software and hardware.

**Web Developer**
AdServices, Inc.   -   Hollywood, FL   -   August 2015 to October 2016
