WORK EXPERIENCE

Web Application Developer
VitalChek   -   Allen, TX - July 2016 to July 2017

Worked on a large scale application that provides the UI for the collection of vital records such as birth certificates, death certificates and other government records. The interface was highly granular in roles and permission based on the multiple types of users that accessed the system and individual records. I was contracted primarily to help implement the UI for a new client by adding customization as requested to an existing template of web forms and classes.
* Model web pages for new client based on existing CSS, pages and classes.
* Debug issues in .NET OJB website.
* Creation of SQL scripts to handle web page enhancements.
* Handle enhancements as assigned to create and modify methods.

Web Application Developer
Custom Information Systems   -   Arlington, TX - July 2015 to November 2015

* Development of user web portal for veterinary clinics using JQuery and ASP.NET C#.
* Development of tables, views and stored procedures on a SQL Azure platform.
* Development of web portal using MVC.
* Involvement in various aspects of the software development lifecycle including requirements capture, design, implementation, testing, installation and support.

Web Application Developer
Equine Best Practices   -   Grand Prairie, TX - September 2013 to July 2015

The primary focus was to collect data from an existing local application used by clinics and upload it into a cloud-based application that would contain a user interface that greatly expanded or created accounting functions for the clients.
* Development of user web portal for veterinary clinics using JQuery and ASP.NET C#.
* Development of tables, views and stored procedures on a SQL Azure platform.
* Worked with end-users to troubleshoot issues and implement suggestions for portal enhancements

Web Application Developer
NCTCOG   -   Arlington, TX - April 2007 to September 2013

I worked on multiple applications as needed, primarily in Classic ASP with the primary one being the AirCheckTexas program that allowed low income users to apply for state funded vouchers to repair or replace a vehicle that was failing the state-mandated emissions test.
* Maintained content for multiple websites using Classic ASP and ASP .NET (C# and VB).
* Configured IIS settings for multiple websites.
* Developed tables, views, and stored procedures on various SQL Server platforms.
* Assisted in upgrade and conversion of SQL databases from SQL Server 2000 and 2005 to SQL Server 2008 R2.

* Worked with data on vehicle inspection records from TxDoT and DMV to identify fraudulent vehicle inspections.

Web Application Developer

Kforce   -   Dallas, TX   -   January 2007 to April 2007

Worked as a contractor for NCTCOG as a web developer.

Web Application Developer

Mortgage Resource Network   -   Dallas, TX   -   May 2006 to December 2006

Worked as a web developer creating intranet web portals using Classic ASP.
