WORK EXPERIENCE

Software Developer
Trinity LLC   -   Starkville, MS - April 2017 to Present

Lead developer responsible for UI/UX of interactive touch screen interface for liquor mixing dispenser
that has been developed and patented by Trinity.
= Made official decisions determining what hardware (Raspberry Pi with an IPS touchscreen), software
(Linutop Linux), and programming languages (C# backend with a GTK# front end for the application, Bash
scripts called by application for various OS properties, and XML in order to keep a record of everything ordered)
would be incorporated in the creation of the system.

Software Developer
Green Royale LLC   -   Starkville, MS - March 2017 to Present

Lead developer for an website/application known as "The Spot" which is still a work-in progress
= Made official decisions that determined which languages, frameworks, and resources would be used
= Main front-end developer (CSS3 and HTML5) and overlooked and reviewed back-end development
(PHP and JavaScript)
= Maintaining the server and databases that are currently being use (MySql)
= Planning to port the web app to a mobile/desktop app that will be developed in C#
