WORK EXPERIENCE

Network Engineer
I3 International - Kokomo, IN - 2014 to 2014

2014 Position Network Engineer in a very short term project team experience in the installation of cisco catalyst 6500 type series in a global company in Kokomo, Indiana. Company worked for: I3 International. Member of a team involved in the upgrading of corporate network switching infrastructure.
Roles and Responsibilities in the position:
As a network engineer I was involved in the replacement of a catalyst switch with a newer model.

Various roles
 - 2006 to 2013

entrepreneur in computer sales/marketing/shipping, parent, writer.

Technical Support Technician/Engineer
CallTech Communications - 2004 to 2005

in a Verizon project, a major internet service provider. Member of a network operating center. Company worked for: CallTech Communications, a contractor of Verizon.

Roles and Responsibilities in this position:
I provided telecommunications support, cisco router support, modem support, and computer system troubleshooting, configuration, and operations support in the project to Verizon DSL internet subscribers. In this role, I was able to help some of the remote customers who call into the network operations center with their issues with internet connectivity.
In this high pressure role in a network operating center, I helped Verizon DSL customers with a variety of issues which affect their internet connectivity. Some of these issues include router problems, computer problems, modem problems, and problems with their telecommunications links were handled in a collaborative team environment.
