Web Architect

Centresource   -   Nashville, TN - August 2007 to October 2007

Web Development

Built and managed web solutions and web sites compliant with the World Wide Web Consortium (W3C) Standards, as well as in alliance with Web 2.0 (Content compatible with Mobile/Legacy Devices as well as modern browsers)

Worked with technologies involving: HTML, XHTML, CSS, PHP, MySQL, CVS, SVN, Adobe Photoshop, Drupal, e107, and SSH.

Owner/Systems Engineer

Middle Tennessee IT   -   Tullahoma, TN - December 2005 to July 2007

Provide IT Consulting, Services, and Support

Duties included finding new clients for the growth of the company, IT consulting for new and existing customers, network and systems engineering and upgrades, software solution deployment and integrations, technical/security audits and penetration tests, outsourced IT services (independent and joint with some internal IT departments), managed security services (firewall/anti-virus/anti-spyware/spam), web/e-mail hosting solutions, remote backup solutions. Companies business model was to be a customer's "Total Solutions Provider," be it through internal resources or key business alliances to ensure the client receives the right overall solution in the end.

Experience/Duties:
• Microsoft Windows Server 2000/2003 (Standard, Enterprise, and SBS)
o Implementing Domain Controllers into Peer-2-Peer Environments
o Configuring/Deployment/Management of LDAP (Active Directory), DHCP, DNS, DVCP, WINS both internal to single sites as well as built multi-site environments using replication of all technologies between multiple subnets and branch location servers for
fail-over/redundancy/load-balancing.
• Configured/Implemented/Deployed/Managed Firewall, IDS, IPS, and VPN Technologies including both Round Robin and Wheel-and-Spoke Network Topographies using both PPPtP and IPsec at up to 1024bit Encryption.
• Created and Managed Real-Time Incremental and Nightly Backup Routines to include magnetic media, real-time site-to-site distributed filesystems, nightly incremental, and full disaster recovery plans including monthly DR simulations and data verification.
• Multi-site connectivity using all technologies including Cable, DSL(PPPoE), ISDN Circuits,
T1 Trunks, Point-2-Point Technologies
• Routine Cisco Router/Switch Management
• Server/Network/Workstation Standardization and Optimizations
• Remote Technology Integration and Deployments including:
o RDP - Microsoft Remote Desktop / Terminal Services
o Citrix Metaframe Environments and Multiple Farm Management
o 2x Application Server (Citrix Like Seamless Application Environment)
o VNC / Helpdesk Support Solutions

Senior Systems Engineer

Integrated Solutions and Technologies   -   Tullahoma, TN - August 2004 to December 2005

IT Consulting, Service, and Support

Worked with company to develop the technical standards, support processes,
service-call tracking, marketing materials, and business processes to grow this small start-up
company to a profitable company with a strong foundation and infrastructure that could grow
seamlessly with the increase of additional clients and employees.

Experience/Duties:
• Managing Technical Department's Open Jobs, Daily Support Issue, and other Field Technicians.
• Developed/Documented Technical Standards for all Technologies (OS Configurations/Installation Guides/ Troubleshooting Guides and Checklists)
• Network and Systems Engineer for new clients.
• Senior Level Support when required for all company field-technicians.
• Web Development/Server/E-Mail Administration for clients
• Hardware and Software Installation/Integration Contractor for business partner Shiptec Systems - Multi-carrier Shipping Solution and warehouse management software (Required programming for download/upload from client's existing database system, integration with UPS/FedEx/DHL's shipping services as well as USPS Postal Manifesting and Bill of Lading Creations, customer's business rules and logic, as well as custom client requests.)
• Technical Resources and Advisor for sales presentations to ensure proposed solutions to clients were accurate and any additional questions/concerns could be answered.
• Internal Network Administrator – Managed 8 in-house Microsoft 2003 servers, Microsoft CRM, MS SQL Server & Databases, Incremental/Daily Backup Routines, Internal Watchguard 4500 (Firewall/Radius Server/ IDS), Admin of User Accounts and Security, Developed in-house application for managing employees hours and real-time employee location information.
