Abu Bah
Full Stack Web Developer

Fair Lawn, NJ - Email me on Indeed: indeed.com/r/Abu-Bah/375bbc630a04be46

Highly focused and driven individual, always seeking out developing trends and technologies. I love what I do and sometimes it feels as if I've never worked a day in my life - true story. Writing code, like poetry, is an art form and I really enjoy it.

Currently I work as a full stack web developer, leveraging open source technologies to create and maintain flexible, scalable, and reliable web applications reaching millions of users per year. I work on front-end applications utilizing core web technologies (HTML, JavaScript, CSS) as well as back-end design and implementation (PHP, ASP, MySQL, Apache) - producing modular, efficient object-oriented code. I have foundational knowledge of C++, but have primarily focused on PHP-based web services and APIs.

I possess the necessary skills to approach nearly any situation with the confidence and knowledge to get the job done, on time and on budget.
Authorized to work in the US for any employer

WORK EXPERIENCE

Software Developer
Diversified Media Group - Kenilworth, NJ - May 2017 to Present

Lead Web Developer
Brimar Industries, Inc. - Garfield, NJ - February 2015 to May 2017

A manufacturer of safety signs, pipe markers, and mailing tabs, Brimar Industries is a leading provider of a large variety of products. Founded over 25 years ago as a manufacturer of pipe markers, Brimar has now grown into a foremost source of street signs, valve tags, parking signs, and mailing tabs.

As the Lead Web Developer, I am responsible for the development and maintenance of multiple high-traffic, customer-facing sites, as well as our internal sites and software. I supervise our team of developers from project start through completion. In addition, we leverage open-source technologies to strive for highly efficient, fault tolerant, and scalable systems.

- Managed team of frontend and backend developers.
- Designed and developed custom MVC framework to manage public web sites.
- Created RESTful API to deliver site content.
- Technologies: PHP, Javascript, MySQL, Git, Node.js
- Agile, JIRA

Web & Mobile App Developer
Yapster - New York, NY - June 2014 to February 2015

Yapster is an audio social network that focuses on content such as news, sports, radio shows, fashion, food, friends, family and much more in 40 second clips.

- Developed and maintained the Yapster iOS app - similar to the Twitter app - but with audio recordings as the medium through which users communicate with one another.

- Technologies: Objective-C, Xcode IDE, Python, MySQL, Amazon Web Services

Web Manager

Tradical 360   -   New York, NY - October 2013 to June 2014

Tradical 360 are a social media marketing company located in the heart of New York City for consumer branding, design, or SEO needs.

- Developed and maintained several client e-commerce CMS websites.
- Managed marketing campaigns and SEO – driving site traffic up by over 200%.
- Technologies: PHP, WordPress, JavaScript, MySQL, Drupal, Magento

Web Developer

GAL-Inc.   -   Fair Lawn, NJ - January 2013 to October 2013

G.A.L. Inc. is a website development and internet marketing company that has been helping businesses increase their bottom line since 2001. They custom tailor each project to the client's business needs. They understand their client's proposition as well as their target audience, implement their internet marketing experience and expertise to provide lucrative digital marketing solutions for brands.

- Developed/designed websites using HTML5 & CSS3, JavaScript and Classic ASP.
- Created custom Content Management Systems (CMS).
- Developed custom shopping carts for e-commerce.
- Created and managed several databases for clients.
- Technologies: ASP, MySQL, FileZilla, JavaScript
