WORK EXPERIENCE

Backend Developer
American Express Publishing   -   New York, NY - August 2008 to February 2009

10036

Contract Work: At AmexPub I worked on the Coldfusion version on the web site for Food & Wine
magazine. While there I continued the development of a recipe syndication tool with a rich front end
user interface written in OO javascript. Additional I developed and completed the front-end interface
for a wine pairing tool. There were two versions of the wine pairing tool, OO javascript and ExtJS.
Keywords: Coldfusion, OO javascript, ExtJS, UI/UX Design, MSSQL

Backend Developer
State Bar of Arizona   -   Phoenix, AZ - February 2008 to August 2008

85016-6288

Contract work: At the State Bar of AZ I migrated their existing back end web application to the Fusebox / MVC framework. This involved reading and improving on the existing Coldfusion code. Optimizing the SQL code for performance and dividing the code into reusable modules that prevent duplication of code and helped to facilitate a lower cost of ownership. Additionally the internal web applications were moved to a Coldfusion 8 server and were supported with FLEX utility applications.
Keywords: Coldfusion, FLEX, FLASH, MSSQL

Backend Developer

Market Street Web   -   Chicago, IL - March 2007 to February 2008

60618

As a Software consultant working under the corporate name of Market Street Web.
I completed numerous projects:
a. Developed a specialized survey for an intranet application that included both on-line and print OMR (Office Mark Registration) data entry, OLAP (On Line Analytical Processing) and dynamic
graphic based reporting for the Rodgers Group.
b. Developed an intranet SNMP Network Scanner that allowed for daily monitoring of mission
critical networked assets for Incapital Holdings, LLC.
c. Completed factory automation firmware that extended the manufacturing capability of existing
equipment for Kintz Plastics, Inc.
d. Developed the back end of an internet e-commerce site for collecting payment for a dedicated product and allowed users to apply for additional services for Michael Mack - The Credit
Man.

Keywords: Coldfusion, SQL, HTML, CSS, JavaScript, PhotoshopCS2, ImageReady CS2, Flash,
XML, LadderLogix, Panelbuilder, MS Access, MSSQL

Backend Developer

American Bar Association   -   Chicago, IL - July 2006 to March 2007

60610

Contract work: I worked under the Center of Professional Responsibility (CPR) at the American Bar Association This work I provided was of a sensitive nature and I have been asked to remove the details of my work performed from this resume. While there I completed an internal application for
updating and maintaining internal data that involved many unique and detailed business model rules.
Keywords: Coldfusion, Oracle, HTML, CSS, JavaScript, PhotoshopCS2, XML

Backend Developer

Incapital Holdings, LLC   -   Chicago, IL - January 2004 to March 2007

60602

At Incapital Holdings, LLC. I was responsible for building and maintaining the public facing websites and some of the internal Intranet trading platforms and financial portfolio valuation tools. These
sites included www.incapital.com , www.incapnet.com (trading platform) www.interNotes.com,

eu.internotes.com. Additionally I designed and deployed the ladderBuilder(TM) Bond portfolio analysis tool currently used on the InterNotes.com site. I was also part of a team of developers that created the Certamen tournament engine that is currently running all of the seasonal sports challenges

on www.structuredinvestments.com. In March 2005 my responsibilities shifted from software

development to network administration and security management. These responsibilities included
server maintenance and live backups over a worldwide network that included multiple domains across
4 major sites, each connected via secure VPN tunnels with redundant out of network ISPs.
Additionally my responsibilities included network based voice recording, Televantage TV6-7 IP-based
phone systems,
Sonicwall enhanced OS Firewall administration (CSSA-1 & CSSA2) and IPC Voice communication
server administration. This work involved extensive travel and coordinating of project based work with vendors
from multiple time zones.

Keywords: Coldfusion, SQL, HTML, CSS, JavaScript, PhotoshopCS2, ImageReady CS2, Flash,
XML,MicroSoft SQL Server. MS Exchange 2000/2003, Blackberry BES Server 4, Active Directory
(AD), LDAP, MCSE, NT Security, SNMP, Backup Exec, DHCP, TCP/IP.

Backend Developer
Atomic Imaging   -   Chicago, IL - April 2002 to January 2004

60622

Software developer - My responsibilities included Coldfusion / HTML / JavaScript. I worked as the backend
software integrator that connected web applications to the database and flat file storage. I
later moved in to Kiosk design and software UI interface programming using HTML and LINGO.
Keywords: Coldfusion, SQL, HTML, JavaScript, Photoshop5, Macromedia Director LINGO ,
MicroSoft, SQL Server. MS Access

Software consultant
Steven Benjamin, Inc   -   Dobbs Ferry, NY - 1999 to April 2002

- worked under the corporate name of Steven Benjamin, Inc. As a consultant,
I provided mostly database applications to business in the manufacturing sector. This occasionally
included simple web user interface and some basic HTML websites. This work also included touch
screen user interface training and machine operation firmware.
Keywords: HTML, JavaScript, Photoshop, Macromedia Director - LINGO , MicroSoft SQL Server
(Sybase) . MS Access.

Allen Bradley Developer / Integrator
Infrared Direct, Inc   -   Dobbs Ferry, NY - 1992 to 1999

10522

Infrared Direct was a business that I started in 1992. Infrared Direct provided software based industrial
control systems for factories running electric and gas infrared ovens. I developed and sold software and
hardware based program logic controllers designed to maximize electrical efficiency and increase
control of closed loop temperature guidance systems. Later we introduced software for managing gas
catalytic systems that monitored an array of variables to eliminate the possibility of gas combustion.
This software is still be used today by Vulcan catalytic and American Catalytic Systems. Infrared direct
was purchased in 1999 by Ceramicx, LLC.
Keywords: Rockwell Software Ladder Logix,, Allen Bradley PanelBuilder, Autodesk AutoCad.

EDUCATION

development and design
Northwestern University   -   Chicago, IL
February 2010 to December 2011

SKILLS

AutoCad. (7 years), Coldfusion (9 years), CSS (4 years), Javascript (10+ years), SQL (9 years)

ADDITIONAL INFORMATION

Skill Set Summary:
AMP + PWA (view JS)
Angular JS (ver.1 ver.2 & ver4) (Very strong with all components of Angular JS)
Ionics Hybrid Mobile Platform (ver.2 & ver.3)
Sencha ExtJS ver 6.x (MVVM)
Meteor and the MEAN stack.
Steroids JS, Backbone, Knockout
HTML5 / CSS3 / jQuery, jQueryUI, jQueryMobile, Sencha, YUI, ExtJS 3 & 4, topcoat
Coldfusion: 4.0 - 11 & Coldfusion 2016 (tomcat)
Lucee 5.x
PhoneGap (Cordova) 2.9-4.0 & Android Hybrid Development & iPhone Hybrid Development.
SQL (Structured Query Language) ANSI 92 (Stored Procs & Performance Tuning)
MSSQL, MYSQL, Oracle, SQL Anywhere, Sybase
CFCs, UDFs, Custom tags
Node JS, vanila js
CVS,Subversion & Git & Git Farm
XML/XSLT, DHTML/CSS, table less design
OO Javascript / XHR / AJAX /JSON (Restful)
CSS1 & CSS2 & CSS3
MVC & MVVC
FuseBox: 3-5 (including FuseQ)
CFWheels
AutoCad / Visio
