WORK EXPERIENCE

Software Engineer
 - April 2014 to Present

Automated functional testing using Selenium Web Driver
*Developed a workflow for our product release cycle to manage builds, versions, and quality
assurance.
*Main technical contact for all International database exports - worked closely with developers to meet
technical specifications.

Tier 1 Technical Support Engineer Endurance International Group
 - April 2013 to April 2014

Performed appropriate and timely troubleshooting of technical issues in a high pace contact center
environment.
• Worked with customers to describe products and services in order to persuade potential and current
customers to renew or purchase products and services.

Operations Manager Z-Labs
 - October 2011 to April 2013

Designed marketing materials and email campaigns which lead to an increase in sales.
• Maintained weekly and monthly inventory reports.
• Provided effective and efficient competitor analysis for new and old product development.
