WORK EXPERIENCE

Project Manager

ManTech International Corporation - January 2013 to Present

CLIENT: Department of Veteran Affairs (January 2013 to Present)

Contract: Systems Center Configuration Manager (SCCM) Operability Enhancements (OE) – Jun 2017 – Present

Supporting Department of Veteran Affairs on the SCCM OE contract. SCCM is used for Enterprise patch management, delivery and installation of national software packages, operating system deployment, asset and configuration management, and computer power management. Support includes Program Management, SCCM Field Technical Engineering Support, Migration Implementation Support, and Report development. Tier 2 and 3 support for VA SCCM, reporting, and SCCM 07 to CM12 migration support.

Contract: Identity and Access Management Support (IAMS) – Jun 2017 – Present
Supporting the Security Architecture and Software Assurance Office (SASA): Identity and Access Management (IAM). SASA is responsible for maintaining an enterprise business vision relating to IAM efforts. Currently, IAM capabilities are decentralized silos and are handled by individual organizations and system applications. As the Enterprise IAM Business Sponsor, SASA IAM brings to VA a disciplined, technical, and methodical approach to the deployment of IAM Services, supports the implementation and integration of identity and access management services, and provides policy development, requirements control, overall guidance, and management support for enterprise-wide IAM services. Support areas include Security Architecture and SASA IAM Support, FICAM Services Security Support, and Implementation and Integration Support.
Contract: Memorial and Corporate (MemCorp) Products Delivery Portfolio Program Management Office Support – Jun 2017 – Present
Supporting the MemCorp Program Management Office (PMO) in its management, business, and programmatic oversight responsibilities on multiple complex IT development, modernization and enhancement programs and projects. ManTech provides project management and PMO level support for Memorial Products and Corporate Products.
Contract: Sustainment Telemedicine and Vista Imaging (STVI) – Jun 2014 – May 2017

Supported Department of Veteran Affairs on the STVI contract. Provided VistA Imaging maintenance and sustainment and Tier 3 user support services to VA and Health and Human Services sites currently utilizing VistA as part of their patient record. Maintenance and sustainment support included updating software to repair defects, maintaining tables, addressing patient safety issues, providing Health Product Support orientation, working problem tickets, serving as a representative of support on software development project teams and supporting the field during system upgrades. Included providing interoperability testing of both DICOM and HL7 interfaces to verify commercial devices requesting connection to VistA. Also includes maintaining Food and Drug Administration (FDA) compliance on VistA Imaging as it is considered as a Class I medical device.
Contract: VHA Point Service Kiosks Phase II PMO Support – Sep 2015 – Jun 2016

Provided PMO support on the Veterans Point of Service (VPS) Kiosks program which is part of the Integrated Health Plan (IHP), an initiative whose mission is to improve the quality and efficiency of the care provided at VA Medical Centers (VAMCs) by increasing the integration and interoperability of healthcare information systems used at VAMCs.

Contract: Integrated Hospital Operating Plan (IHOP) Project Management Office (PMO) Support Services – Sep 2013 – Sep 2015

Supported Department of Veteran Affairs on the IHOP PMO SS contract. Provided PMO support services to improve the quality and efficiency of the care provided at the VA Medical Centers (VAMCs) by increasing the integration and interoperability of healthcare information systems used at VAMCs. The support services provided as part of this project included Project Support and Technical Support. The PMO support services were provided for Bed Management System (BMS), Surgical Quality and Workflow Management (SQWM), Clinical Video Teleconferencing (CVT), Home Telehealth Capability Enhancement (HTCE), and VA Point of Service (VPS) Kiosks projects.

Contract: Integrated Operating Model (IOM) IT Product Delivery Support Services – Jan 2013 – Dec 2013

Supported Department of Veteran Affairs, Office of Information Technology Product Delivery (OIT PD) division on the IOM IT PDSS contract. Providing PMO support services to selected VACO OIT projects with support services in support of the Information Management/Information Technology (IM/IT) systems to meet VA mission and goals. The support services provided as part of this project included Project Management, Management Support, Functional Management Support and Technical Support. Highlights include:

• PMO support services on CFM, VATAS, PMAS Dashboard, and Primavera projects
• Management support to the OIT PD Front Office
• Functional and technical management support on the HRIS project. This includes IPT Facilitation support
• The project accomplished "Excellent" rating in the quarterly QASP. Given the startup issues on the project, this is an outstanding achievement

Group Manager
Wyle - November 1999 to December 2012

CLIENT: ONR, Navy (June 2012 to December 2012)
As a Program Manager for the Office of Naval Research (ONR), managed resources that worked on the NAVRIS (Oracle eBusiness Suite), Business Intelligence (BI) and ONR Global applications transition to Navy ERP (SAP). Work included using Oracle Project Contracts module for setting up WBS in NAVRIS and integration with the existing NAVRIS setup similar to Navy ERP and supporting the respective reporting in BI dashboards. Also managed the transition of ONR Global custom financial application - FRED to MS-SharePoint application. Highlights include:
• NAVRIS WBS project for Navy ERP (SAP)
• Hybrid Business Intelligence (OBIEE) Reporting Solution for Navy ERP (SAP)
• ONR Global custom financial system transition project to MS SharePoint
• Tech Solutions Website – Intranet and Extranet site development using MS SharePoint

CLIENT: FMCSA, DOT (November 1999 to June 2012)
Manage a team of 65 highly skilled Subject Matter Experts (SMEs) and Functional Experts in the Federal arena. Support FMCSA, DOT on multiple contracts such as the CIO Support ($50M), the LAN/WAN Support ($7M), the IT Security Support ($5M), and the Helpdesk/Data Entry Support ($5M).

Provide expertise in budget and financial management, subcontractor execution and management, client interaction and support, recruiting and retaining staff through several incentive programs that recognize outstanding performance, processes and procedure development, human relations, quality assurance, and cross-utilization of resources. Provide successful overall approach to contract level program management that ensure operational excellence: People—talented and trained individuals managing and performing the contractual work on a daily basis; Processes—methodologies that accomplish the work effectively and cost-efficiently; Technology—tools and techniques that contribute directly to operational efficiencies; and Knowledge—successful experience, best practices, and lessons learned applied to ensure performance thresholds are met continually. Job responsibilities include:

• Support the various CIO office tasks such as Capital Planning, Enterprise Architecture, Section 508, IT Modernization Program, PMO (project management office), IT Security and LAN/WAN Support, Strategic Planning, and Workforce Planning efforts with required staff, tools, and management controls.

• Manage across one or more projects included within the scope of the contract, involving cross-functional teams such as Web Ops & Dev, IT Communications, IT Planning and Management, and Business & Technical, ensuring coordination and visibility of all project management efforts to the appropriate government officials, including senior leadership, management, and other team members.

• Anticipate bottlenecks, provide management escalation, project prioritization, and make tradeoffs.

• Ensure all contract requirements, including all deliverables and reporting requirements, are met within quality expectations.

• Manage project scope and change control and escalate issues where necessary.

• Interface and provide executive support to government division chiefs, DCIO and the CIO.

• Support Business Case Analysis of Enterprise IT Modernization efforts for the final presentation at the Capital Planning Board Meeting at FMCSA.

• Undertake subcontractor and vendor management on task performance, invoice submission, and other contract-related aspects.

• Conduct strategic meetings with team leads to ensure consistent support to FMCSA.

• Organize, direct and coordinate planning and production of all contract activities.

• Assign, schedule, and maintain delivery of project team activities and deliverables.

• Provide earned value management (EVM) support using ANSI/EIA 748A EVM standards.

• Coordinate program meetings and review program status.

• Manage cost and budget allocation of multiple projects/tasks by negotiating funding and budget modifications.

• Establish and maintain Work Breakdown Structure (WBS) for contact execution and delivery.

• Interface and support government COTR (contracting officer's technical representative) on all contract-related matters.

• Interface with FMCSA Acquisition Department as necessary.

• Responsible for providing Formal Deliverables, Dashboards, Monthly Contract Reports, and Weekly Status Reports to the client. Undertake administrative tasks that include managing numerous Expense Reports, financial aspects of the contracts, and other day-to-day personnel activities.

• Conduct annual and periodical formal/informal verbal and written employee performance appraisals.

• Conduct written/oral counseling sessions as needed for any problem employees.

• Provide monthly and yearly budget forecasts for all support programs.

• Explore new opportunities and initiatives within existing contracts and grow revenue. Provide support on winning proposal bids.

• Maintain spend plans for all the contracts responsible and provide monthly/weekly updates on the funding situation to company vice-president and general manager. Update budget projections every month for all labor and non-labor charges.
