Alex Eberle
Software Developer

Overland Park, KS - Email me on Indeed: <u>indeed.com/r/Alex-Eberle/6a3ef3e6eafa2b92</u>

I am a software developer with a passion for learning as much as I possibly can about application and website development. Ever since I discovered writing code, it has been one of my favorite hobbies, and one that I was able to turn into my career. My colleagues have often commented on my abilities to learn quickly and easily adapt to changes. I am looking for a professional position where I am able to use my abilities to help provide the best software solutions for the company, along with growing as a person.
Authorized to work in the US for any employer

WORK EXPERIENCE

Software Developer
Wachter, Inc   -   Lenexa, KS - October 2016 to Present

Worked as part of an agile team to supported and expanded an ASP.NET/C# application managing the majority of the company's operations.
Projects included:
- Tool Management System:
  ○ A system written in C#, using Telerik UI controls, to manage all tools for the Wachter warehouses. Developed a system for assigning tools to individuals, and designed and created new SQL tables and views for storing and retrieving data.
  ○ Included functionality for individuals to sign off on tools, a history record for tool assignments, and the ability to transfer tools between individuals.
- Subcontractor Tier Management:
  ○ Developed a system in C# to allow supervisors to rating subcontractor performance and ratings, and designed and created new SQL tables for the new data structure.
  ○ Added functionality to existing maps within the system to allow individuals to create a tiering structure for subcontractors appearing on the maps.

Software Developer
American National   -   Springfield, MO - October 2013 to September 2016

Worked as a team to develop workflows, convert legacy applications, and automate business functionalities being done by hand for business needs in the IBM BPM tool.
Projects included:
- Work Item Locator: A system that allowed individuals to search through any work item processed through a workflow in the IBM BPM tool, with functionality to reassign, terminate, and place work items on hold.
- Developed multiple billing workflows that allowed individuals to request refunds for customers, track every approval level for refunds, and manage billing of customers.
- Developed admin tools for accessing DB2 databases within the IBM BPM tool, sending support emails, restarting failed or stalled work items.
Maintained various systems including:
- Email Watcher: The core email system for the company. Main service written in VB.NET with C# web services.
- Agent Email: An application for sending out mass emails to insurance agents, written in C#.
- Issues 32: An issue tracking and auditing system for the company, written in VB6.

Associate Software Developer

Old Town IT   -   Springfield, MO   -   June 2011 to September 2013

Worked alone and as part of a team to develop custom implementations for the netFORUM association management system.

Projects included:

● NACHA: Converted NACHA's website from ColdFusion to Drupal, while integrating various netFORUM systems, written in ASP.NET/C#, into the Drupal site.

● Army Emergency Relief: Developed functionality within netFORUM, using ASP.NET/C# user controls and web forms, for members of AER to manage financial requests coming into the association. Designed and created new tables and stored procedures in SQL for AER-specific data within netFORUM. Created systems for managing loan processing and payments.
