Bill Gildart, PMP
Project Manager

Yarmouth, ME - Email me on Indeed: indeed.com/r/91f311c12ed87a27

Qualifications:
PMP certified and experienced project leader. Experienced in business process and requirements definition, detail planning and scheduling, resource management and coordination, deployment, implementation and post production support. Well versed with both Application and Infrastructure Projects, minor enhancements to major scale out initiatives. Communicates efficiently and effectively between the client, management and technical SME's. Always looks for potential process improvements while keeping ROI and the clients' best interest in mind.

Objective:
Obtain a Project Management position in a fast paced, quality first reputable company, potentially developing into a long term career opportunity.

IT Experience:
CSC PM:
Currently PM for a Marine Information Modeling and Planning system upgrade. Environments/Applications: Catia/Enovia Delmia executed via Waterfall Methodology. (CSC Oct. 2013 – present)

Recently PM for a Model Based Work Instruction Pilot. The pilot required a coordinated effort between an onsite technical support team, a client pilot team and a vendor support technical support team. Environments/ Applications: Catia/Enovia, Delmia, 3DVia Composer, executed via Waterfall Methodology (CSC Sept. 2013 – Jan 2014)

Managed multiple legacy application small enhancement efforts aimed at expanding end user functionality and efficiency. Short durations, quick turnaround time, lots of team interaction. Environments/Applications: Web Services, Java, ADF faces, OID, BPEL, UNIX, Windows, MS Access, executed via Agile & Waterfall Methodologies. (CSC Oct. 2012 – Oct. 2013)

PM for a major applications development project aimed at increasing overall end user efficiency by providing a robust yet simplified web based toolset and dashboard for "One Stop Shopping". The dashboard style tool enable users to quickly find high level and detail level information regarding past and upcoming work in the manufacturing process allowing them to plan and report accordingly from one to four weeks ahead of schedule for their respective crews. Environments/Applications: Web Services, Java, ADF faces, OID, BPEL, UNIX, Windows, Mainframe, executed via Agile Methodology (Oct. 2012 – present)

PM for 2 concurrent MIM Pilots, assisting the client in developing future business cases and long term strategies based around a major legacy system upgrade. Pilots both require extensive vendor interaction and coordination, creation and configuration of multiple servers, environments and local installs to vendor and client specifications. Environments/Applications: Windows, Unix, Oracle, Databases, client servers, Symantec, Catia V6, executed via Waterfall Methodology. (CSC Feb. 2013 – June 2013)

BIW PM & SME:
While with BIW prior to CSC, executed the role of client PM and Product Owner on the above mentioned Agile Project. (BIW Nov. 2011 – Oct. 2012)

Previously PM with BIW on a major legacy system migration (10+ applications impacted) due to contractual and security agreements these systems cannot be disclosed. The overall effort involved both application developers and an infrastructure team and totaled more than 6000 man hours. Waterfall Methodology (BIW Nov. 2011- Oct. 2012)
