Vaishnavi Goud
Net Developer

Austin, TX - Email me on Indeed: indeed.com/r/Vaishnavi-Goud/ec3f84534adae0b1

✓ Highly motivated individual with 3 plus years of diverse progressive experience in Information Technology, with emphasis on ASP.NET
✓ Expertise in developing applications using .NET […] C#.Net, ASP.Net, Asp.Net MVC 3.0 & 4.0, ADO.Net, XML, HTML, AJAX, JavaScript, XHTML, DHTML & CSS.
✓ Experience working with databases such as SQL Server […] Oracle
✓ Experience in working with Java Script, JQuery, AngularJS, Angular 4and Bootstrap 2.0/3.0.
✓ Extensive experience in ASP.Net, C#, VB.Net, ADO.Net, Web Services, LINQ, AJAX, Windows Services, WCF Services, OOPS, Classic ASP, XML, XSLT, HTML, Text Editor, MS IIS, DHTML, ArcGIS server JavaScript, Angular JS, SQL Server […] Visual Studio […]
✓ Experience in writing stored procedures, user defined functions, views, query writing.
✓ Expertise in writing services, directives and controllers in Angular JS.
✓ Experience in developing single page applications using Angular JS.
✓ Excellent experience in using Angular Bootstrap.
✓ Ability to work in all stages of System Development Life Cycle.
✓ Extensive Knowledge on Microsoft .NET Design Patterns including Dependency Injection (DI), Inversion of Control (IOC), Singleton, MVVM and MVC
✓ Used Web services - WSDL and SOAP for testing
✓ Strong experience in working with Ajax and JSON.
✓ Expertise in Test Driven Development (TDD).
✓ Created RESTful web services interface to Java-based runtime engine and accounts
✓ Expertise in working with source control TFS and VSS.
✓ Expertise in working with Waterfall and Agile development methodology.
✓ Hands on experience with SQL Server and T-SQL in constructing triggers, tables, user functions, views, indexes, user profiles, relational database models, data dictionaries, and data integrity.
✓ Expertise in implementing Object Oriented Programming (OOP) Concepts including Inheritance, Abstraction and Polymorphism.
✓ Strong programming and debugging skills in C#
Willing to relocate: Anywhere
Authorized to work in the US for any employer

WORK EXPERIENCE

Net Developer
Johnson & Johnson - December 2016 to June 2017

This project involves designing web application to allow users to create and approve purchase requests. Worked as an Intern and primary developer for the application.

Responsibilities:
• Worked with n-Tier Architecture involving Services Layer, Data Access Layer, and Business Layer
• Creating the models, views and controllers using ASP.NET MVC 3, C#.NET.
• Extensively worked on User Interface (views) using CSS, HTML, AJAX, Java Script, JQuery and Bootstrap.
• Used Entity Framework for database operations.
• Used Agile methodology to implement the application.

• Worked on Maintenance of database-backed websites.
• Developed Business Logic layer by implementing Object Oriented Programming Language (OOPs) features like Inheritance, Polymorphism, Abstraction and Encapsulation in VB.NET.
• Used Datatables and jQuery validations plugins for client side operations.
• Responsible for code merging using Microsoft Team Foundation Server (TFS) and for other source code maintenance needs.
• Performed GIS data management by recommending enhancements to system architecture.
• Added functionality that ingested data from a SOAP web service.
• Implemented Caching, Session State, Cookie Management, view state, POST and GET techniques.
• Implemented security technologies in ecommerce development.
• Designing the WCF Service based on the requirement and created separate WCF services project which is integrated with BLL.
• Used Test Driven Development (TDD).
• Implemented security technologies in ecommerce development.
• Consumed the WCF services using JQuery Ajax calls to enable effective communication
• Extensively used Visual Studio 2010 development tool for building Web Application.
• Developed reports using SSRS.
• Created SSIS Packages.
• Analyzed business processes to identify challenges and created solutions through the use of database and communication software across the entire company
• Manage database security, Design, develop and implement automated data backup.
• Developed database objects like Tables, Views, and Stored procedures in SQL Server 2008.
• Analyzed test results, including user interface data presentation, output documents, and database field values, for accuracy and consistency
• Created SSIS Packages.
• Assisted in preparing presentations and scheduling meetings
• Involved in complete SDLC life cycle of the application.
• Prepared unit test cases and performed N-UnitTesting prior to system implementation

Web Developer
Kore Technologies - September 2014 to March 2015

• Have experience of Software Development Life Cycle (SDLC) and Software testing Lifecycle (STLC) using the Waterfall.
• Involved in understanding of business processes and coordinated with business analysts to get specific user requirements.
• Documented ETL test plans, test cases, test scripts, and validations based on design specifications for unit testing, system testing, functional testing, regression testing, prepared test data for testing, error handling and analysis to get the desired results without any issues.
• Experience in writing and designing the templates for the Test Plans, and wrote Test Cases on Excel Sheets and Summary reports.
• Executed SQL Queries to retrieve data of patient's records and Defects reporting.
• Excellent in SQL concepts like DDL, DML, sub queries, joins set operators and conditional expressions. Used SQL statements extensively to retrieve data for database testing.
• Worked on SQL queries like stored procedures, Functions, Triggers to get the data from Sql Server and Oracle.
• Skilled at performing system integration (SIT), functional and user acceptance (UAT) testing, creating the test environment and provided test data.
• Debug and fix defects by making appropriate modifications and retest the code to ensure expected results are produced.

• Experience in various Extracting, Transforming and loading (ETL) tasks using SSIS including tools like SSIS packages with proper control & data flow element.
• Conduct defect triage meetings to discuss/close the defects and go through the future implementation plan.
• Write or contribute to instructions or manuals to guide end users.
• Write, update, and maintain computer programs to perform extraction, transformation and loading data to the inventory.
• Experience in coordinating with the Dev/application team and Users to make sure that we are meeting the requirements by conducting regular meetings/discussions.

EDUCATION

education and instruction
Southern New Hampshire University
October 2016 to December 2016

Bachelors in Computer Science Engineering
JNTU
August 2015

SKILLS

DATABASE (1 year), MS SQL SERVER (1 year), SQL (1 year), SQL SERVER (1 year), .NET (Less than 1 year)

ADDITIONAL INFORMATION

TECHNICAL SKILLS:

Languages C, C++, C#. Net, ADO.NET, PL/SQL, Core Java, and SQL.
.NET Technologies .NET Framework 2.0, 3.0, 4.0& 4.5, […] C#.NET, VB.Net, ADO.NET, MVC 3/4/5, Win Forms, Web Services, LINQ, WCF, Web API.
Web Technologies ASP, HTML, HTML5, Java Script, JQuery, Angular JS, XHTML, DHTML, CSS, CSS3, XML, XSL, XSLT, SOAP, RESTful web services, and Bootstrap.
Database SQL Server […] Oracle 10g/11g, My SQL
Protocols SOAP, TCP/IP, HTTP
Application/Web Servers MS IIS
Development Tools MS Visual Studio.NET […]
Operating Systems Windows 8/7/Vista/XP
